

Making your patients' support needs a priority. Together.

Pfizer is committed to helping patients get their prescribed Pfizer Oncology medications. With Pfizer Oncology Together, patients get personalized support including help identifying financial assistance options and connections to resources that may help with certain day-to-day challenges. We will work with you and your office staff to help your patients better understand their financial assistance options and the access and reimbursement process.

GET SUPPORT FROM LOCAL FIELD REIMBURSEMENT MANAGERS

Pfizer Oncology Field Reimbursement Managers (FRMs) can provide assistance for any medication in the Pfizer Oncology portfolio, as well as localized support and coverage options to you on behalf of your patients. They are also trained to help facilitate patient access to their medication and can help address specific access issues—in person or over the phone.

FRMs are Certified Professional Coders through the American Association of Professional Coders, which means they are familiar with the billing and coding process for Pfizer Oncology injectable medications.

FRMs SUPPORT PATIENTS BY:

- Addressing challenging or urgent Pfizer Oncology patient cases
- Clarifying benefits verification results and payer requirements, including guiding healthcare professionals to forms and template letters
- Providing support for co-pay cards and vouchers
- Helping troubleshoot specialty pharmacy issues
- Educating office staff on our financial assistance and access and reimbursement resources
